

MAG6412

Intelligent PA Center Extender

Features

- 4U standard cabinet.
- Dual 10/100M self-adaptive network interface.
- EMC industrial design.
- Aluminum alloy brushed panel.
- Used to extend the functional modules of the network system, supporting up to 12 functional modules.

Description

The MAG6412 Intelligent PA Center Extender is a new module interface box device. With dual network redundancy design, it can be mounted to any place access to the network. With host intelligent control, it is required to be configured remotely through the management software before it can be used normally, without the need for local control. It can be connected to our company's telephone paging card and audio acquisition card, supporting up to 12 modules.

Specifications

Model	MAG6412
SNR	LINE: 75dB; MIC: 60dB
Distortion	No higher than 0.5% @ 1kHz;
Input Level	LINE: 250mV; MIC: 8mV
Input Impedance	LINE:10k Ω ; MIC: 10k Ω
Output Level	0dBV
Power Consumption	20W
Protection	F1AL
Power Supply	AC 220V/50Hz
Outer Dimension (L×W×H mm)	535×390×285
Machine Dimension (L×W×H mm)	483×330×220
Gross Weight	10kg
Net Weight	9kg
Configuration	User manual (1 copy); power cord (1 piece); key (2 pieces)
