

## D6324 Channel Infrared Radiation Panel

### Features

- High capability of launching. With distance up to 50 meters (25W) and 30 meters (15W).
- With the host synchronization switch function.
- A variety of transmit power adjustable (15W / 25W) to adapt to different venues.
- Emission adjustment. Can be adjusted based on different venues.
- "Hand in hand" way to achieve multiple radiation unit in series.
- Can be fixed with universal configuration bracket or with a triangular bracket to install.
- Emission Angle at Half Power launching angle:  $\pm 22^\circ$

### Specification

Model	D6324
Power	AC100-240V
Transmit power	15W/25W (Optional)
Average firing angle	$\pm 22^\circ$
RF input	Impedance: 5k $\Omega$ , Voltage: 150mV—3V
Maximum coverage distance	30M (15W )
Automatically open the switch threshold voltage	50mV (Radio frequency signal)
Size	433L x 232W x 51H (mm)
Weight	5KG
