

WJ-25

All-Weather Acoustic Hailing Device

Description

This product is a 400W all-weather acoustic hailing device. With high-end speaker unit, it brings high speech intelligibility and excellent sound reinforcement effect, which is suitable for all kinds of outdoor applications, such as highways, stadiums, beaches, parks, plazas and other places that need high-power public address systems.

Features

- Adopt top-level speaker unit, with high sensitivity and high sound pressure level.
- All-weather design, waterproof, moisture-proof and shock-proof.
- With high SPL., this product can achieve long-distance directional transmission of high-intensity sound waves, and stimulate human hearing organs and central nervous system through high-intensity sound pressure to disable or dispel the target, further to refuse and disperse the crowd without producing permanent harm. Also, it can carry out long-range broadcasting, publicity and warning to the crowd.
- As a typical non-lethal weapon, this product is not restricted by international conventions and does not cause adverse international political influence. It is widely used in anti-terrorism and stability maintenance, such as handling illegal gatherings, riots, insurrections, and other mass incidents, regional vigilance, maritime law enforcement, border protection, and bird-driving at airports. Therefore, it is of great significance in safeguarding the security of the country and protecting the lives and properties of the people.

Specifications

Model	WJ-25
Rated Power	400W
Rated Impedance	8Ω

Sensitivity (@1m/W)	112±2dB
Maximum Sound Pressure Level (@1m)	138±2dB
Effective Frequency Range (-10dB)	500Hz~5kHz
Speech Intelligibility (STIPA Value)	0.7@100m
Directivity (H×V)	60°×90°
Net Weight	22.5Kg
Dimensions (W×H×D)	679mm×246mm×288mm

Basic Dimensions
